## Belt Drive TandemX Pump - SBC Crate Kit

MAY 2016

KSE's new Belt Drive TandemX Pump - SBC Crate Kit provides a complete fuel & power steering pump setup with drive components for crate motor applications requiring "front engine installation" (i.e. IMCA A-Mods). This kit includes a Belt Drive TandemX Pump (PN# KSC1064-002), Direct Head Mount Kit (PN# KSC1060), Billet Bypass Fuel Regulator (PN# KSC2005), and Crate Single Belt Drive Kit (PN# KSC1026). This kit was developed for the 604 crate engine but can also work with many other standard SBC applications with heads that have provisions for auxiliary 3-bolt mounting. This kit was designed to provide quick & simple pump installation, easy fuel pressure management, and a complete drive kit setup with a 22/40 Tooth HTD Pulley combination for increased low speed power steering assist.

### Belt Drive TandemX Pump - SBC Crate Kit

TandemX Pump Kit & Drive System For Crate & SBC Applications\*. Includes: Belt Drive TandemX Pump (KSC1064-002), Direct Head Mount Kit (KSC1060), Bypass Fuel Regulator (KSC2005), and Crate Single Belt Drive Kit (KSC1026) PN# KSC2020-002

604 Crate  
Motor Installation

### Product Features & Benefits

- Clean & Simple Belt Drive TandemX Pump Setup
- For 604 Crate Motor & SBC Applications\*
- Perfect For IMCA A-Modifieds or Similar
- Utilizes Bypass Fuel Pressure Regulator
- Works With Gas & Alcohol Fuel Applications
- Improved Pump Mounting Location
- Optimized Drive Kit For Improved Power Steering Assist
- Manufactured From Lightweight, Billet Aluminum
- 100% Manufactured & Built In The USA
